## Course Summary

This course provides hands-on training for Primavera's client/server-based solution, leading participants through the entire project life cycle, from planning to execution. Topics include adding activities, assigning resources, and creating a baseline. Participants also gain a thorough background in the concepts of planning and scheduling. All workshops and instruction stress the three basic elements of project management: schedule, resource and costs.

## Learning Outcome

- Create a project
- Add activities
- Schedule a project
- Assign Resources
- Adjust Project Schedule
- Create reports

## Course Objective

- Introduction to the P6 EPPM web user interface .
- How to create and plan projects without resources including creating WBS, adding activities, relationships and constraints.
- Formatting, filters, layouts and printing.
- Assigning Baselines and updating an un-resourced project.
- Adding and assigning Roles and Resources.
- Updating a Resourced project.
- Successful completing of the workshops is required to complete the course.

## Course Descriptions

Participants will create a project, add activities and relationships, assign resources, adjust the project plan to account for schedule delays and over allocated resources, and analyze portfolios. Participants also will learn how to customize the Personal Workspace and the Project Workspace to monitor project progress and communicate with team members. Oracle BI and BPM are not covered in this course.

The course uses P6, Primavera' Web-based project management tool. It is divided into four sections: Overview and Creating a Project; Scheduling the Project and Managing Data; Assigning Resources and Baselineing; and Project Execution and Control

### Learn to:

- Create a project
